PROJECT

CIFOS 2024

- Airline Operations Management Platform is a comprehensive solution designed to streamline and optimize various facets of airline operations. Platform offers a suite of tools aimed at enhancing efficiency, safety, and decision-making processes within airline operations.

CASPER 2024

- CASPER is an innovative application and tech-enabled platform. It is designed to facilitate high-rise infrastructure projects, particularly those within the vicinity of airports, by providing comprehensive guidance and support in obtaining No Objection Certificates (NOCs) from airport authorities.

Diabos 2022

- This project focuses on providing efficient port cost management services to global shipping companies. DIABOS streamlines port expense settlements, disbursement accounting, cash flow management, and vendor coordination. The platform is designed to enhance transparency, reduce operational costs, and improve financial accuracy for maritime businesses.

SKILLS

- Front-end: Angular, HTML5, CSS3, Bootstrap, Angular Material
- Back-end: Node.js, Express.js, MongoDB, PostgreSQL, Firebase, Python.
- Middleware: RESTful APIs, Stream APIs
- Server: AWS EC2, Firebase Cloud Functions, cPanel, Nginx, Apache, GeoServer.
- Tools: VS Code, GitHub, Git, npm, Postman.
- Geospatial: GeoServer, GeoJSON
